

Clemson Talk, & Mankato

Good stuff worked for speech

Re Full-empl. on small planet.

Env. degradation per forced land conv.

- auto use
- non-charging for residuals, overuse of utils., air & wtr.
- sprawl inflates collection costs, materials handling
reduces feasibility of using by products, & recycling.
(Shredder, etc., large opt. scale.)
- billboards
- oil spills, drainage, stripping
bias to premature exploration
- imperialism, war. War wastes resources. We waste
res. to secure res. to waste
- urban invasion of rural land; & shock waves
- premature water dev.
- taxn. Sub. land for capt. (man-made) & labor.

Munkato supplement

~~Intro~~ No broken-window fallacy.

A. Timber.

Need to produce w. more labor, less land, less capt.

- { 1. Taxes now discourage reforestation.
- ✓ Cannot expense regen. cost. (so, let nature do it)
 - ✓ Avoid prop. tax by not regen.

2. Taxes encourage land acqu.

Can expense int. & prop. taxes

Can go far toward expensing logging roads

Low prop. tax on land as such.

No tax on Δ L.V.

Arguing firm can ~~deplete~~ arrogate L.V. to timber & deduct it.

Arguing firm can allocate much of purchase price to timber it cuts first, claiming it is where the value is

3. Bias to long life. Cap. gains; deferral of tax, inc. & yields

At first seems good. But wait

a. As land needed. Apply labor every 80 yrs
instead of 40, half as often. Means sub. land for labor.
also means more logging road miles.

b. Also, apply less labor each time. Res. for
long life, must use little initial cost, else it can't pay.

c. More land ^{stays bare} ~~stays bare~~ longer after cutting

d. More miles of logging road.

Need to use fewer resources; more labor. Subst. labor for land.

Self-defeating policies of low density --- enforced resource cons.

Recycling. Promote by removing tax favors from virgin mtl.

✓ Standards, specs. Require quality in terms of labor ^{input}, not material content.

✓ Mass system would save space. But biases vs. them.

Underuse of best urban land means invading bucolia.

✓ → { Can't see the system for the subsystem. Fallacy of composition. Intensity here means intensifying everywhere.

Stripping minig. Result of sub's capt. for labor.

Recycling urban land is inept.
