Sales Tax Revenues Compared with Taxable Property Values, California Counties, 1993-1994

Mason Gaffney

I. California Counties

Table 1. California Counties: sales tax revenues vs. assessed. values of taxable property, 1993-1994. (See \landfrac\calcntys)

(Data below probably overstate sales tax revenues, because the state rate is below 8%, and not all cities and counties add to it.)

COUNTY	A.V.	Taxable Sales	8% of Taxable Sales	(4)/(2)	
	\$\B	\$B	\$B		
(1)	(2)	(3)	(4)	(5)

Some findings from Table 1.

1. Counties with high sales tax/A.V. are Shasta, Stanislaus, Sacramento, Fresno, Imperial, Tulare, Kings, Yolo, San Joaquin.

2. Counties with low sales tax/A.V. are Marin, Napa, Santa Barbara (vacation/retirement/commuting), Inyo, Mono (minerals), Sierra, Calaveras, Nevada, El Dorado (timber, vacation homes).

3. Counties in #1 also have low income p.c.; those in #2 have high income p.c. See $\frac{\text{land}}{\text{c}} \frac{\text{tax}}{\text{c}}$

California state budget = \$80b, 1999. *Los Angeles Times*, 7 Nov 99, A28.

Cf. state sales tax revs = \$22b (plus whatever cities get, presumably one-eighth or so of that amount more).
